Think It Over

Introductory

The present volume constitutes the 1944 edition of Henderson's Directory of Medicine Hat and Redcliff. The work embodies a complete epitome of the civic, commercial, social and industrial interests and activities of the municipality. It is a modern Directory in all its parts and includes all the essential features which have proven so satisfactory to our patrons in previous issues; these have been retained and amplified, and improvements have been added as suggested by experience in order to add to the value and usefulness of the Directory thus fully meeting the requirements of patrons; the approbation and continued patronage accorded the work are constant incentives to better service.

The publication has had the benefit and advantage of the complete organization and resources of the publishers, and of the skill and experience of their corps of enumerators and compilers added to the courteous co-operation of citizens, in the production of the volume.

Under Wartime Prices and Trade Board Regulations we have been instructed to reduce the quantity and weight of paper used in our publications by 25 per cent.

To effect this economy, and to give our Patrons the same reliable information as in previous issues, we have used smaller type and lighter weight paper than in previous issues.

Although this Directory does not contain the same number of Pages as the last issue, the information contained therein has in no way been impaired by these changes.

THE STREET AND AVENUE GUIDE

THE STREET AND AVENUE GUIDE starting on page 35 features the names of all streets and avenues arranged alphabetically and numerically, giving the location, number on the street and showing the occupant.

The intersecting streets are shown in the order that they come.

♣ Denotes that there is a Telephone in the house.

THE ALPHABETICAL DIRECTORY

THE ALPHABETICAL LIST OF NAMES of citizens, business firms and corporations starts on page 69.

THE CLASSIFIED BUSINESS DIRECTORY

THE CLASSIFIED DIRECTORY at the end of Book, exhibits the various manufacturing, mercantile, and professional names, compiled under headings appropriate to the class of industry or profession followed.

ADVERTISING MEDICINE HAT AND REDCLIFF

An important function of the Directory is to set forth the characteristics and advantages of the city as a place of residence, as a business location, as an industrial site, and as an educational centre. The Directory acts as a mirror, reflecting all that is noteworthy in the city in the above respects. In order to spread this information regarding the city broadcast over the country, the publishers have placed copies of this issue of the Directory in the directory libraries, where they are readily available for reference use by the public. There they serve as perpetual advertisements of Medicine Hat and Redcliff, for business men the country over realize that the City Directory represents the community as it really is.

The publishers take this opportunity of thanking the citizens for valuable assistance rendered in the way of furnishing information concerning themselves, their friends and their business interests for this Directory, and also the public-spirited and progressive business and professional men for support given in the way of patronage.

Respectfully, The Publishers

HENDERSON DIRECTORIES LIMITED.

Medicine Hat, Alberta

LOCATION

Medicine Hat is beautifully situated on the banks of the Saskatchewan River, and in the heart of the rich prairie country known as "Sunny Alberta."

The city possesses several special features which tend to make it a thriving and prosperous centre. On account of the cheap fuel obtained from its natural gas field, Medicine Hat has become the chief manufacturing centre of the Western Provinces. It is located about midway between Calgary and Moose Jaw, and hence is the distributing centre for a large and rich area of country. The school system of the city is one of the very best. The health of the city is good, much credit for which is due to the excellent water system and to the fine climate of this part of Western Canada.

NATURAL GAS

The City's greatest asset, its natural gas, immediately attracts the attention of the visitor, and the following questions come to his mind in regard to it: What is the composition of this gas? What is its origin and of what use is it?

Medicine Hat natural gas is noted for its purity. It is composed principally of methane, otherwise known as marsh gas, fire damp, or light carburetted hydrogen. In most localities of its occurrence, natural gas has 80 to 90 per cent. methane, the remainder of the gas being made up of heavier hydrocarbons and air constituents. In many cases the heavier hydrocarbons are capable of condensation as "natural gas gasoline." Medicine Hat natural gas however contains 99.47 per cent. methane, and is known as a "dry gas" having insufficient moisture or heavier hydrocarbons to cause any trouble in pipes from condensation and freezing.

Methane is composed of the chemical elements, carbon and hydrogen, in proportions by weight of three of carbon to one of hydrogen. Hydrogen is our lightest known gas, and is noted for the heat of its flame. Next to pure hydrogen methane has the highest power of all common gases. Householders find that at 25 cents per thousand cubic feet (the price charged in Medicine Hat), a house can be heated for less than half what it would cost to heat with anthracite coal at \$7.00 per ton. Since manufacturers secure a rate of 3 to 6½ cents per thousand cubic feet, it is little to be wondered that Medicine Hat has become the manufacturing centre of the West.

HEAT, POWER, AND ELECTRICITY

The following rates for heat, light and power obtaining in Medicine Hat will enable one to judge of the practical value of the natural gas.

It is municipally owned, and is the only fuel used in the city for domestic use. The citizen is charged 25 cents per thousand cubic feet, while the rates for manufacturers are 3 to 6½ cents per thousand cubic feet, according to the amount used.

The manufacturing possibilities of Medicine Hat natural gas are exceptional, not only from a fuel standpoint, but also when we consider what can be made from the gas itself. Owing to its purity, the gas can be used in manufacturing processes not possible in the majority of natural gas localities.

The gas, again, is used for the production of electric current in the city's up-to-date power plant. This electric current for lighting and power is supplied at rates varying from ½ (half a cent) to 6½ cents per kw. hour, according to the consumption.

COAL DEPOSITS

Within a few miles of the city limits are vast quantities of high grade lignite coal, which is being mined and distributed to the surrounding country at an exceptionally low cost to the consumer.

Traffic Bridge across the South Saskatchewan River

Riverside Park, showing War Memorial

RAILWAYS

Medicine Hat is a divisional point of the Canadian Pacific Railway, is at the junction of this company's main line with the Crow's Nest Line, and has connection also with the Soo Line of the same system. There are five hundred C.P.R. employees resident in Medicine Hat, inclusive of those working out of this city. The monthly payroll for the Division, with headquarters here, is \$100,000.

ELEVATOR CAPACITY OF MEDICINE HAT MILLS

Compiled by Medicine Hat Chamber of Commerce, January, 1941:

Name of Company	Bushels capacity
Alberta Linseed Oil Co. Ltd.	55,000
Maple Leaf Milling Co. Ltd.	500,000
Lake of the Woods Milling Co. Ltd.	250,000
Ogilvie Flour Mills Co. Ltd.	500,000
Total capacity	1,305,000

PUBLIC SCHOOL SYSTEM

The most remarkable feature of Medicine Hat's development from town to city proportions is the way in which good and sufficient organization in every department of community life has kept pace with the rapid growth.

A well chosen staff of teachers meets the educational requirements of a progressive management. Those in charge of the more important departments of school work, as in the primary, public school leaving and high school classes are exceptionally well qualified teachers, capable of giving superior service in the class room. The administration of school affairs is thoroughly systematized, with properly proportioned responsibility resting upon the Board of Control, superintendent, principals, teachers, school officials, janitors and pupils. Efficiency has been proved in the capable manner in which a rapidly growing school population has been received, accommodation well graded and in all respects well provided for.

THE CHURCHES

We are proud of the commercial and educational institutions of our city, and with these the religious needs of the community have not been neglected. All Christian denominations are well represented the city possesses several imposing church edifices. Among the denominations are Anglican, Presbyterian, Roman Catholic, Christian Science, Baptist and Lutheran.

GENERAL HOSPITAL

This is an institution of which many cities much larger in population might well be proud. It serves a large area of country as well as the city, and is noted for its high standard of efficiency in every department.

WATER SUPPLY

Hardly less important than the churches, schools and hospital, for the welfare of the community, is a pure and adequate supply of water. This Medicine Hat can lay claim to. The water is taken from the Saskatchewan River at a point three miles above the city, and passes through an up-to-date system of purification before being used.

BANKING INSTITUTIONS

Branches of the following chartered banks are located in this city: Montreal, Royal, Dominion, and Canadian Bank of Commerce.

The bank clearings show the substantial financial growth of the city. We give the returns showing the past seven years:

1934	\$10,988,541.00
1935	12,995,361.00
1936	12,367,706.00
1937	12,092,715.00
1938	12,080,166.00
1939	12,903,438.00
1940	14,104,394.00

WHOLESALE CENTRE

Situated, as Medicine Hat is, in the centre of a large farming and stock raising area, the city must of necessity become the headquarters of numerous wholesale houses, some ten being already located here.

STOCK RAISING

Since the first settlement of the Great West country, stock raising has always been an important industry in Southern Alberta. The wide expanse of grassy plains, broken only by streams of pure water from the hills made it a veritable paradise for the big rancher and his fearless cowboy riders.

The last decade has seen large areas of this range land thrown open to the homesteader, and the grain grower now occupies much of the land on which roamed the big herds of horses and cattle. The grain grower is giving attention to stock raising, and it will always continue to be very important, if not the most important, industry in a country so well adapted for it.

Meteorological records show the average temperatuer for the growing season in this belt to be the same as it is in Southern Montana.

System of Street Names and Numbering

The city has been divided into four sections, namely North, South, West, and the district south of the river and east of Division Avenue, which has no name now. The North district is north of the river and east of Division Avenue and is that part which was formerly known as Northeast. The South district is south of the river and west of Division Avenue, formerly known as Southwest. The district now known as West is that part which lies north of the river and west of Division Avenue, and was formerly called Northwest. The fourth district is that which was formerly known as Southeast, and comprises that part situated south of the river and east of Division Avenue. This district now has no name.

The number of the street will indicate the distance from the divisional street or avenue. The abbreviations N., etc., will be used in each case. The river is the dividing line for the streets and consequently Esplanade will be First Street or First Street West, according to whether east or west of the West Road Allowance.

The Avenues are numbered from the West Road Allowance, which will be known as Division Avenue. On the north side of the river the other avenues will be First, Second, etc., North and West, while on the south side of the river the avenues will have no district name or will be South according to whether it be east or west of Division Avenue, and will be numbered in the same way from Division Avenue.

South Railway Street and North Railway Street will retain their names. The streets on the hill and south of the C. P. R. tracks, formerly known as 5th A, B, C, and D, are now changed to Aberdeen, Belfast, Cambridge, and Dundee. On the north side of the C. P. R.

tracks, the streets formerly known as 5th, A, B, C, D, E, F, and G, are now changed to Braemar, Balmoral, Ross, Yuill, Dominion, Queen and Elm. The portion of Sixth Street which lies north of the C. P. R. tracks is now known as Bridge Street.

In numbering the streets it was found best to begin not with 100, as was first planned, but with 1. Thus in the first block from the dividing avenue or the river the numbers begin with 1. In the second block they begin with 101, and in this way the number of the block is always one more than the first figure or figures of the street number. Thus number 532 would be in the sixth block.

In determining location with the new names and numbers it will be necessary to remember several things:

First—All avenues run north and south.

Second—All streets run east and west.

Third—There are four divisions of the city, and the Streets and avenues are named after their respective divisions, with the exception of the Southeast district, which now has no name.

Fourth—The number of the block is one more than the first figure of the street number.

NOTE—The arrangement in the following Street and Avenue Directory is in numerical order, with Avenues preceding Streets. Streets and Avenues not numerically named appear last in alphabetical order.

Where the odd and even numbers on an Avenue or Street are separated, the south side (odd numbers) on Avenues will appear first, and the west side (odd numbers) will appear first on Streets.

**More than
ninety per cent. of
all advertising mediums
are discarded before
they're a year old**

After the new ones come out
your advertisement in the di-
rectory is still good, for old
directories are seldom dis-
carded while they hold to-
gether. Years later many of
these directories will still be
in active use. Your advertise-
ment is still in service

Do you want LONG-LIVED advertising?

HENDERSON DIRECTORIES LIMITED

Redcliff

In what must eventually become the manufacturing belt of Western Canada, Redcliff occupies a most prominent position through its immeasurable advantages over the other places.

LOCATION

Redcliff is situated on the north bank of the South Saskatchewan River, and on the main line of the Canadian Pacific Railway, about mid-way between Winnipeg and Vancouver.

NATURAL RESOURCES

Rich Coal Deposits

Redcliff has one of the largest working coal mines in Western Canada, with a shipping capacity of one thousand tons per day. This high-grade coal is in great and constantly increasing demand.

Natural Gas

Redcliff has an unlimited supply of Natural Gas, containing 1,100 B.T.H. units per cubic foot. This is supplied to manufacturers at five cents per thousand feet (equivalent to coal at a cost of one dollar per ton); and to domestic customers at a correspondingly low rate.

Clay Deposits

Redcliff has already attained distinction in the production of bricks that are hard, durable and capable of heavy weight and severe resistance. Dry-pressed, wire cut, fireproofing, hollow and all kinds of fancy building brick are manufactured. Three large plants are operating throughout the entire year. Redcliff has all the raw materials for high-grade pottery, Portland cement and other allied lines of manufacture.

Cheap Power

Nature has given Redcliff a strong advantage in its possession of cheap power (2.40 per horsepower, per Annum, per ten-hour day). Cost of production is reduced to a very low point. In the grind of competition, Redcliff's manufacturer has a safe margin of profit on this basis alone. Redcliff's inexhaustible supply of pure water is one of the crowning features of that combination of resources which makes well-balanced development not only possible, but inevitable. Water from the Saskatchewan is passed through a natural system of filtration. A reservoir capacity of 300,000 gallons and efficient distribution to all parts of the city is already accomplished.

Unique Industrial Opportunity

Redcliff's level, accessible area makes possible the grouping together of allied industries, with all the advantages of easy shipping and distribution, for a fraction of the cost involved in other places. "Overhead" charges growing out of the cost of construction at points where territory is uneven, and where other natural disadvantages have to be overcome, are eliminated at Redcliff.

Big Industries in Operation

- 1—Dominion Glass Co. Ltd.
- 2—Gunderson Brick & Coal Co. Ltd.
- 3—Redcliff Pressed Brick Co. Ltd.
- 4—Redcliff Premier Brick Co. Ltd. (closed)
- 5—Alberta Potteries.

Distributing Area

Within a radius of from a hundred to two hundred and seventy-five miles of Redcliff are Calgary, Edmonton, Regina, Saskatoon, Moose Jaw, Swift Current, Weyburn, Battleford, North Battleford, Athabasca and Lethbridge. And between all these, hundreds of smaller towns and villages are clamoring for the products Redcliff's factories will distribute.

SCHOOLS AND CHURCHES

Redcliff has a large, modern school, well equipped and affording all the advantages to be found in a city many times its size. Church services are conducted under the direction of the various denominations.
